

Sample Learning Schedule

One of the great benefits of online training is that it's self-paced! You can decide when you're ready to move forward within a course or from course-to-course. However, learning is more effective if you set learning goals. Below, we've created a sample training schedule that will allow you to go through the content at a reasonable pace. Your schedule may be different, but don't spread out your learning too much as it may be more challenging to recall concepts that you learned early on.

LEARNING SCHEDULE

Course

Exercises

Review

Day 1

Appian Essentials

Application Architecture

Create an Application

Step-by-Step # 1 & 2

Day 2

Users and Groups

Expressions: Transform Data

Step-by-Step # 3 & 4

Day 3

Records Part 1: Accessing Your Data

Step-By-Step # 5

Day 4

Records Part 2: Record Type Relationships

Step-by-Step # 6

Day 5

Write Data with Custom Data Types

Queries

Step-by-Step # 7

Day 6

Process Modeling 101

Step-by-Step # 8 & 9

Day 7

Reports

Sites

Step-by-Step # 10, 11, & 12

Day 8

Interfaces 102

Interfaces 103

Exercises for Interfaces 102 and 103

Day 9

Delivery Methodology

UX Design & Appian

Day 10

Review exam topics

Take the **Associate Developer Practice Test**
