Learning Paths: Overview & Links

Now that you've completed Appian Essentials, continue by taking one of the below learning paths. Read about each path to decide what path is the right choice for you!

Learning Path	Description & Link
Appian Developer	Do you want to become an Appian Developer? Enroll in the Appian Developer learning path. The courses in this learning path will teach you how to navigate the Appian platform and build an application. You'll learn best practices for object design, configurations, and security. Follow along with the video lessons, and then practice building an application to reinforce core skills through hands-on exercises. **Link:** https://academy.appian.com/#/curricula/4ec18f7b-604e-4473-b476-87279969c946
Appian Foundations	If you're a business user — such as a Business Analyst or Project Manager — this learning path is for you. The courses in this learning path will provide you a better sense of an Appian project and application planning, so that you can communicate effectively with Appian Developers throughout the application lifecycle. You'll learn the terms, tools, and objects that make up an application, and you'll see how to leverage Appian for mocking-up user interfaces and business workflows. **Link:** https://academy.appian.com/#/curricula/4533900a-3905-4d97-a8f0-35dccdbb2eec
